You are young and smart but your thick-lensed glasses make you a persona non-grata at the feast of life. Nonetheless, an unexpected chance turns up for you to become a man. The only thing is, during sex you find out that having it teleports you to other worlds... which you'll have to save from global disasters and catastrophes. LIN:

Whatever you like. We still have a premium at the synthesizer.

As if she wanted uppy. As if asking for pens. She grabbed me by the ears and pulled me down to her sweet little face. I felt a timid, clumsy kiss.

It's a visual novel. If that's your cup of tea then it might be alright. However, it is INCREDIBLY long.. I guess I'm not target audience, still glad it was cheap when i bought it.
